Our roads are created in fee simple – We, The People own them! Not the Government. This proposal to charge people to use their own roads is yet another example of the politicians of the current government' displaying contempt for ordinary Australians by treating them purely as a source of income for companies, that those same politicians will no-doubt end up as board members after they've been kicked out of office!

Please hold an election now, so we can elect some people with some decency and integrity.
