We cannot allow this deregulation.

It will close a lot of small businesses and make it tougher than what it is know.

If it becomes open slather the majors will just take over as they have already and manipulate all markets from food. liquor and fuel.

Small supermarket should be allowed to carry small amounts of liquor for resale.

Jobs will be at risk and future development of small businesses will cease. No one will consider building or developing a small business whether in a city or regional.

Country people enjoy their local business and the personal interaction they have with their local store.

Staff turn into robots at the majors particularly with the introduction of self serve checkouts.

Serious thought must be put into the ramifications if this got passed and the amount of extra leased shops becoming available and would remain empty for a long time.
