I found out about the proposal to charge Australian motorists tolls on all roads from another web site and was totally appalled that a submission was presented let alone accepted. It is disgraceful. Our roads have already been paid for by us the people. We pay through taxes, registrations, fines, levies, tolls. Our roads to my understanding are fee simple, owned by the Australian people who paid for them. I had to drive to the city a week ago and found out it cost me an additional \$17 per trip. Who am I paying and why? I also wonder how it came about that a major road becomes private and then use government resources to chase up unjust charges and fines? Many more people need to realise the so called government are not working for the best interest of its people. They are working for corporate greed. I believe that one of the conditions to privatise a utility or service is that it must be of benefit to the people, the public, the taxpayers and the original owners of the services. That would be us the people. The lies, spin and propaganda our government would have us believe to push through agendas that do not benefit the people only benefiting the political campaign and corporate government. You the government is a disgrace, a joke and certainly not governing for the benefit of the people. Wake up Australia you are being stooged, lied to and manipulated.
