After reading an article in our local news paper , article heading " Katter urges motorists to reject bid to charge toll on every road " if this is what government is proposing this is a disgrace , we are sick and tired of being ripped off every day by our state and federal governments , north Queensland subsidises the larger cities far to much with little return , if you want to live in the city you pay, we don't have the infrastructures , like city cats, trams , commuter trains ect like cities , you are going to kill of any incentives for any one to invest in rural industries, because of road costs , we have further to travel than cityites , cost to electricity, insurances, petrol, food, housing costs, are all going up, no thanks to government polocies , maybe if the wages of politicians were halved and all the perks taken of them there might be plenty of mo! ney, also if the government stoped throwing our hard earned taxes to all the freeloader immigrants , we just might have enough money to pay our Australian hard working people for medication which most can't afford, When is this government going to grow a spine and stand up for Australians instead for illegal immigrants who will one day take over and own our country. are they going to pay for all the government rip off's, of course they will have all of your jobs.
