The draft report says, "Moreover, taxes and charges on road users in general are not directly linked to the provision of roads."

Road users are already charged via vehicle registration. THIS money SHOULD be "directly linked to the provision of roads".

AND

The roads built by government do not belong to the government - they belong to the people. Since the roads belong to us, the people, we should not be charged to use them. It's like paying your janitor so that you can walk into your own house. No-one does that. There should be no tolls on ANY road, just as our constitution says.
