

Hi guys

Just a quick note .I am an airline pilot and a couple of years ago I was getting a 240volt Kitchen Aid blender from a shop that sold 240v equipment .The price to me was approx \$280 (us) and in Macys I think they were \$220 (us) But In Australia they were \$660 (aust) The outlet Told me that the manufacturer had stopped supplying 240v units as the Australian arm had requested 240v supply be stopped as it was affecting what was their profitable market in the world.

Regards

Dennis Caldwell
