

Hi Thank You for the opportunity to submit an email to your Competition Policy review body.

I am a small manufacturing company and have found it harder to compete against the overseas market.

We manufacture Earthmoving Attachments locally in Tullamarine Victoria.

We have found there has been an influx of overseas importers supplying products of the same nature into the market.

As you can understand, it has become ever increasing harder to compete

Even my competitors are doing it, which concerns me as a Australian and an manufacturer.

I just want to know what support you are going to give us to protect us from this ever increasing challenge.

I don't mind competing on quality for I know we make a far superior product.

The biggest challenge is the price difference.

I feel if you are looking at Competition in trade this should be a big component of it.

If we continue to go do this path we as a country will be just a big container yard for the 3rd world countries inferior products.

I await your reply.

Kind Regards

Pat Davis
